CALL FOR PAPERS

International Journal of Excellence in Smart Learning (IJESL)

A challenge for the 21st century universities worldwide is to educate professionals who have knowledge and skills in sustainable development.The journal aims at providing the right platform for encouraging research, development and practices of smart learning, alongside understanding, managing and complying with the quality issues related to it.

The journal further aims to support community building and foster open smart learning standards. It will also update the e-learning researchers, practitioners, learners and all others related on the latest developments, innovations, changing thoughts and underlying practices in the field. The journal aspires to facilitate the desired changes and re-alignments in education systems to ensure effective delivery of smart learning opportunities at all levels.

TOPICS

With the increasing impact of technology in everyday life, the Journal critically looks at the role of technology in enhancing learning and education and discusses some of the latest innovative methods of managing classrooms and virtual learning. The coverage includes:
